

Air Plus

“
*The best
Air Quality
for your space*”

E-Air Plus by Everel Group S.p.A. is a smart system for air quality detection, to be installed in office and shared spaces. E-Air Plus by Everel Group S.p.A. can detect:

- Temperature
- Total VOC
- Humidity (optional)
- CO2 Level (estimated)

The device **monitors the quality of the surrounding air** and promotes its cleanliness by measuring specific parameters such as **temperature, humidity, CO2** (ppm) and **VOC** (Volatile Organic Compounds) levels.

By reading and adjusting the associated values, **E-Air Plus enables automatic control of the room ventilation system** by varying the power of the ventilating units.

This function is only possible **thanks to the cooperation between E-Air Plus** and one or more **Everel branded ventilating units** equipped with a

The **smart system for Air Quality Detection** to be installed in office and shared spaces that you live

BLDC motor of our production: the devices, connected and integrated with cloud services, communicate with each other, guaranteeing optimal air exchange, as well as **reducing energy consumption and heat loss.**

E-Air Plus can be **placed on a flat surface or hung on the wall** for easy control and its **parameters are available via app.**

E-Air Plus communicates the **status of air quality through light indicators** that take on different colors depending on the healthiness of the air.
